## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Applicant's request during the interview on July 29, 2003 for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 3, and 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Motomura (U.S. Patent No. 6,338,108).

As per claim 3, Motomura teaches a semiconductor memory device comprising:  
A plurality of input terminals for receiving write data, a control signal and an address signal (fig. 2C, elements 24, and 25, address signal is not shown. It is inherent in Random Access Memory to have address signal because the memory is accessed randomly, not sequentially); and at least one output terminal (fig. 2C, element 26), different in number from the input terminals for receiving the write data, for outputting read data (2 input terminals to 1 output terminal), wherein the input terminals are coupled to a first bus (fig. 2C is the request bus, where input terminals are connected to), and said at least one output terminal is coupled to a second bus (fig. 2C, is response bus, wherein output terminal is connected to), and each of the first and

second buses is a unidirectional bus for transferring a signal or data in one direction (col. 3, lines 35-38).

As per claim 15, Montomura teaches the input terminals receive the write data, the control signal and the address signal at common terminals (fig. 9C, element 5).

***Allowable Subject Matter***

4. Claims 4-14, and 17 are allowed.
5. Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mehdi Namazi whose telephone number is 703-306-2758. The examiner can normally be reached on Monday-Friday 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mano Padmanabhan can be reached on 703-306-2903. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
